

ANDEROL is a producer of food-grade lubricants and is committed to compliance with strict Halal standards. The company's aim is to deliver its complete NSF H1 approved food-grade lubricants portfolio to markets where halal certification is required. To facilitate this ANDEROL has obtained and maintains halal certification on its food-grade lubricants under the guidance of our auditing partner "Halal Council of Europe". Together with our partner we continuously strive to have the correct procedures in place in order to be compliant. We confirm that, to the best of our abilities:

- We make sure that all raw materials are of synthetic origin;
- we produce halal products in a dedicated production environment according to ISO 21469:2006 which avoids cross contamination with finished products that are not halal certified;
- we produce our products in a plant that is free of animal components;
- we train relevant personnel regarding the latest halal guidelines.

Tom Kleinschmidt

Business Director ANDEROL B.V.
